EDUCATION

Bachelor's in Computer Science September 2024 - Present
Brigham Young University - Idaho *Rexburg, ID*
3.7 GPA

PROJECTS

Sound-reactive Camera System June 2025 - July 2025

- Designed and programmed an STM32-based directional audio tracking system uses dual analog microphones to detect direction of incoming sound and actuates an SG90 servo motor to rotate toward sound source in real time
- Integrated multiple hardware components (microphones, SG90 servo, STM32 microcontroller) into a real-time embedded system

Heads-up Display for Snowboarding Goggles December 2024 - February 2025

- Collaborated as a team to design, build, and test circuit, code and layout
- Utilized C# to process and display real-time GPS and temperature sensor data on a transparent LCD screen embedded in snowboarding goggles, enabling an unobtrusive and responsive heads-up display

Integral and Derivative Calculator in Python November 2025 - December 2025

- Built a terminal-based calculus tool in Python using SymPy for derivatives, integrals, limits, and series

SKILLS

- Proficient coding in Python, C#, C++, and ARM Assemby
- Experience with circuits, including CPU design, microprocessors, and PCB
- Fluent in Spanish (speaking, reading, and writing)
- Basic accounting knowledge, including prepayment, expense tracking, and basic proficiency in QuickBooks

EXPERIENCE

Emergency Response Operator May 2025 - Present
Becklar - Connected Safety Solutions *Rexburg, ID*

- Provided real-time technical and customer support for emergency safety systems, including fall detection and SOS alert devices; guided users, and facilitated emergency response coordination

Accounting Assistant August 2024 - February 2025
Ringlab Media LLC *Mesa, AZ*

- Utilized QuickBooks and Excel to input and organize financial data

Missionary July 2022 - July 2024
The Church of Jesus Christ of Latter-day Saints *Oaxaca, Mexico*

- Performed 70+ hours/week of service work, teaching, and administrative tasks in high-pressure settings
